- The Clean Energy Solutions Center does not endorse or recommend specific products or services. Information provided in this webinar is featured in the Solutions Center’s resource library as one of many best practices resources reviewed and selected by technical experts.
Some Housekeeping Items

Two Options for Audio (select audio mode):

1. *Listen through your computer.*
   - Please select the “mic and speakers” radio button on the right hand audio pane display

2. *Listen by telephone.*
   - Please select the "telephone” option in the right-hand display, and a phone number and PIN will display.

3. *Panelists - Please mute your audio device when not presenting*

4. *Technical Difficulties:*
   - Contact the GoToWebinars Help Desk: 888.259.3826
Some Housekeeping Items (continued)

• To ask a question
  ➢ Select the ‘Questions’ pane on your screen and type in your question

• Having trouble viewing the webinar?
  ➢ PDFs of the presentations can be accessed at https://cleanenergysolutions.org/training

• Share with others or watch it again
  ➢ A video/audio recording of this Webinar and the slide decks will be made available at: https://cleanenergysolutions.org/training

• Recordings are also available on our YouTube channel
  ➢ http://www.youtube.com/user/cleanenergypolicy
Welcome & Introductory Remarks

Overview of the Clean Energy Solutions Center
- Sean Esterly, National Renewable Energy Laboratory

Presentations
- Manfred Hafner, Partner and Vice-President Consulting, Enerdata
- Yasmine Arsalane, Project Manager, Global Energy Forecasting, Enerdata

Question and Answer Session

Attendee Survey
Solutions Center Background and Vision

The Clean Energy Ministerial (CEM) launched the Clean Energy Solutions Center in April 2011. The Solutions Center:

- Is one of 13 CEM Initiatives, which include:
  - Global Superior Energy Performance Partnership
  - Super-Efficient Equipment and Appliance Deployment initiative
  - Global Lighting and Energy Access Partnership

- Helps governments design and adopt policies and programs that support the deployment of clean energy technologies

- Has more than 35 partners, including IRENA, IEA, IPEEC, Sustainable Energy for All, Bloomberg New Energy Finance and Leonardo Energy

- Is co-chaired by the U.S. Department of Energy and the Australian Department of Industry.
Clean Energy Solutions Center

**Goals**

- **Serve** as the primary resource for clean energy policy information, assistance and peer learning for governments and government-affiliated practitioners.
- **Share** policy best practices, data, and analysis tools across countries.
- **Deliver** dynamic services that enable expert assistance, learning, and peer-to-peer sharing of experiences.
- **Foster** dialogue on emerging policy issues and innovation across the globe.

**Primary**

- Government Policy Makers
- Advisors

**Secondary**

- Private Sector Companies
- Energy Entrepreneurs and Investors
- Non-Governmental Organizations
- Civil Society
- Others Engaged in Clean Energy
Ask-an-Expert: Our Experts in Action

Connects policymakers to a global network of more than 30 energy experts for quick-response technical assistance on policies and programs relating to:

- Renewable Energy
- Energy Access
- Energy Efficiency
- Smart Grid
- Transportation
- Utilities

Delivered no-cost assistance for more than 160 requests from over 75 countries.

Please submit your question directly at cleanenergysolutions.org/expert
Dr. Manfred Hafner is a recognized expert on energy scenario building, supply-demand assessment, energy policy analysis, market and strategy studies on all energy sources and with a special focus on gas and power markets. During his almost 30 years of working in the field of energy, in which he has consulted extensively for energy companies, governments and international organizations, he has gained considerable world-wide working experience and in particular on European, Middle Eastern, North African, Russian and CIS markets. He has coordinated several major interdisciplinary research projects for the European Commission. He is also a Professor of International Energy at Johns Hopkins University SAIS and Sciences Po Paris. He holds a PhD in Energy Studies from Mines-ParisTech (Ecole des Mines de Paris) and Master’s degrees in energy Engineering, Economics and Policy from the Technische Universität München, the University of Pennsylvania and the Institut Français du Pétrole (IFP-School). Manfred speaks fluently in English, French, German and Italian, and fairly in Spanish and Russian.
Yasmine Arsalane is a senior analyst specializing in the modeling of energy markets. Yasmine joined Enerdata in 2011 and since then has been involved in several projects for energy companies and government bodies, leveraging the POLES model and other in-house models dedicated to scenario building and analysis. Her fields of expertise cover the modelling of interactions between energy and climate policies, and the potential effects that these may have on energy demand, supply, CO2 emissions and the development of energy prices. Prior to Enerdata, Yasmine was involved in land-use modelling projects in order to conjointly assess energetic system, food demand and the evolution of environmental constraint (CIRED and INRA). Yasmine graduated as an engineer (AgroParisTech and Ensimag) and earned a MSc in Energy and Environmental Economics (ParisTech).
Question and Answer Session

Please submit any questions through the “Question Pane” of the GoToWebinar panel

Questions

The slides and an audio recording of this Webinar will be made available following the webinar.

- Webinar recording, presentations, and information on upcoming and previously held webinars:
  - https://cleanenergysolutions.org/training

- Webinar recordings at the Clean Energy Solutions Center YouTube page:
  - https://www.youtube.com/user/cleanenergypolicy

- Viewing the recording? Please submit any questions to the Solutions Center:
