Webinar:
The Next Steps in Scaling Finance for Energy Access:
Syndicating Deals between Multiple Lenders

April 18, 2017

Jem Porcaro,
Senior Director, Energy Access
United Nations Foundation

www.unfoundation.org
www.energyaccess.org
To help meet the energy access challenge, in 2011 the United Nations Foundation launched the Energy Access Practitioner Network. The Practitioner Network is the largest global network of small, medium, and large clean energy enterprises, joined up with participants from civil society, government and academia, to deliver modern energy services, particularly decentralized solutions for rural electrification.

The Network’s mission is to contribute to the Sustainable Development Goal of universal energy access by 2030 by:

- Promoting innovation in policy, technology, business and financing
- Amplifying the voice of practitioners in high-level decision-making
- Facilitating increased funding and financing of decentralized energy solutions.

### TECHNOLOGY FOCUS

- **Solar PV**
- **Energy Efficiency Development**
- **Other**
- **Wind**
- **Biofuels**
- **Hydro**
- **Minigrids**
- **Geothermal**
- **Energy Storage**

**Number of Members**

This webinar will focus on the role of syndicated lending for financing energy access.

The webinar is the first in the UN Foundation's financing webinar series which will examine the financing challenges and solutions at the cutting edge of energy access investing.

Please follow live Tweets via @energyaccessPN using #PNwebinar!
Financing continues to be a bottleneck for growth for the distributed energy sector.
